

Bighorn Sheep Policy

PGA West is home to approximately 120 roaming guests. They are Desert Peninsular Bighorn Sheep. You may encounter them as you travel throughout the property. They are beautiful; however, we must remind you that they are WILD animals. Feeding or interacting with the sheep is prohibited. They are also a federally protected and endangered species. It is a serious violation to harass them in any way. The California Department of Fish and Game has been on property investigating at least one harassment allegation and they may issue a citation and a fine.

Each spring is also the beginning of the mating season for the Bighorn Sheep. The rams are aggressive and protective of their ewes. They will be very protective of the lambs. Please do not approach them as you could be seriously injured if attacked.
